

Valtrex Clinical Matrix Team for helpful comments on the manuscript, Dr Maurille Feudjo-Tepie for statistical support, and anonymous referees for valuable suggestions.

CONTRIBUTORS

The study was initiated by DMR and SFC, who were also responsible for developing the survey instrument and critical revision of the manuscript; RKR, JMP, and NJR were responsible for statistical analyses, data interpretation, and manuscript writing; TW and SS provided critical revision of the manuscript.

Authors' affiliations

R K Rana, J M Pimenta, N J Robinson, Worldwide Epidemiology, GlaxoSmithKline Research and Development, Greenford, UK
D M Rosenberg, Worldwide Epidemiology, Asia-Pacific GlaxoSmithKline Research and Development, Singapore
T Warren, Westover Heights Clinic, Portland, OR, USA
S Sekhin, Department of Obstetrics and Gynaecology, Smolensk State Medical Academy, Smolensk, Russia
S F Cook, Worldwide Epidemiology, GlaxoSmithKline Research and Development, Research Triangle Park, NC, USA

Financial support: Financial support for this study was provided by GlaxoSmithKline Research and Development. RKR, JMP, DMR, SFC, NJR are all employed by GSK.

GLOBAL VIEWS

The full text of the Global views can be accessed on www.stijournal.com

Sexually Transmitted Infections receives an increasing number of articles relating to prevalence of STIs or the performance of various syndromic management protocols in different populations. While these are very important for policymakers and clinicians locally, they tend to have limited applicability to other populations. For this reason we will publish these articles, after peer review, in full on eSTI. The paper edition of the journal will feature full abstracts in the “Global views” section.
